

Webinar

PROVEN BEST PRACTICES IN *Elementary Scheduling*

Jan. 16, 2025 - 9:00-10:00 AM

As scheduling season approaches, join us on Thursday, January 16, at 9AM for an insightful webinar on effective practices in elementary scheduling, along with a demo of software that can make the process easier for building leaders.

In partnership with scheduling experts from District Management Group (DMG), we will explore strategies for designing effective school schedules that maximize student learning, enhance teacher effectiveness, and support your district's instructional goals.

In addition, the DMG team will demonstrate how you can more quickly and easily build a school-wide schedule using DMSchedules for Elementary Schools Scheduling Software.

**BEST PRACTICES
IN SPECIAL
EDUCATION**

At this webinar, you will learn how to:

- Establish consistent guidelines for allocating time and providing uninterrupted core instruction.
- Schedule time for interventions and enrichment alongside core instruction.
- Incorporate daily grade-level common planning opportunities.
- Coordinate schedules for staff shared across campuses.

While this software is primarily for elementary schools, it can be used by middle schools who use a cohort model for students.

DMSchedules charges for their software usage, but the webinar will contain information about effective practices in scheduling as well as information on what should drive decisions about a master building schedule.

Don't miss this opportunity to gain actionable insights to streamline your scheduling process. Register today!

About District Management Group

Since 2004, District Management Group (DMG) has partnered with hundreds of school districts across the U.S. to help them strengthen internal capacity and make improvements in student outcomes, operational efficiency, and resource allocation.
